

NATAN M. KASSA

Bellevue, WA | (425) 301-6766 | nkassa@usc.edu | <https://www.linkedin.com/in/natankassa> | <https://natankassa.site/>

EDUCATION

University of Southern California, Viterbi School of Engineering <i>Bachelor of Science in Computer Science and Computer Engineering</i>	Los Angeles, CA Graduated June 2024
• Honors: Graduated with cum laude honors, Dean's List honors (6 semesters) • Relevant Coursework: Data Structures and Object-Oriented Design, Distributed Systems, Theory of Computing, Machine Learning, Computer Architecture, Introduction to Artificial Intelligence, Robotics, Cybersecurity, Probability Theory, Embedded Systems, Physics	

EXPERIENCE

Headstarter <i>Engineering Fellow/Intern</i>	Seattle, WA June 2024-August 2024
• Completed a 2-month software engineering fellowship with a focus on AI development and optimization, resulting in 5 innovative AI projects and active participation in 5 hackathons • Streamlined processes and cleared backlog tasks, reducing project timelines by 4 weeks for a startup	
AskAwayOlympics (AI Chatbot Project) <i>Software Engineer</i>	Bellevue, WA July 2024-August 2024
• Led integration of OpenAI's GPT 4.0 model via server-side API, delivering dynamic, context-aware responses thereby improving the accuracy and relevance of chatbot replies • Optimized application performance by utilizing Next.js for server-side rendering and efficient routing, achieving a 25% reduction in load times • Engineered a multilingual chat interface with React.js, enabling real-time communication in 3 languages, enhancing global user engagement	
DailyBrief (AI News Aggregation Project) <i>Software Engineer</i>	Bellevue, WA June 2024-July 2024
• Created and deployed a news aggregation and summarization application with Flask and FastAPI, enhancing content filtering and reducing information retrieval time by 70% • Utilized Supabase for database management and OpenAI's GPT model, achieving 90% accuracy in content summarization • Developed and optimized web scraping and processing pipelines using Python (Requests, LangChain), enhancing article retrieval efficiency and accuracy	
Signal Cycle Solutions <i>Software Engineer</i>	Los Angeles, CA January 2024-May 2024
• Designed and implemented hardware and software components of a bicycle safety system, featuring automated LED turn signals, a sonar-based lane-changing mechanism, and a real-time speedometer using an ATMEGA328P microcontroller • Conducted extensive testing to ensure system reliability and user safety	
Meta Above & Beyond CS Program <i>Software Engineer</i>	Los Angeles, CA August 2022-November 2022
• Collaborated in hands-on workshops and projects with Meta software engineers; mastering backend development skills, including C++, Python, and concepts of data structures • Engaged in code reviews, debugging sessions, and best practices discussions to strengthen technical skills and foster growth	

LEADERSHIP AND INVOLVEMENT

East African Student Association <i>Event Coordinator</i>	Los Angeles, CA August 2021-June 2024
• Led cultural shows that fostered social, educational, and cultural connections among East African diaspora and those interested in African culture, promoting engagement in enriching forums	

SKILLS

• Boards & Hardware: Arduino Uno, Raspberry Pi, Nexys 4, FPGA Boards • Tools & Technologies: Git, SSH, Pip, Npm, Vercel, OpenAI SDK, Fetch API • Programming Languages: C/C++, Python, JavaScript (ES6), HTML, CSS, TypeScript, Dart, Verilog • Frameworks & Libraries: React.js, Node.js, Next.js, Firebase, Tailwind CSS, Material-UI, Matplotlib, Flask, FastAPI • Soft Skills: Problem Solving, Communication, Enthusiastic, Leadership, Collaboration, Resourcefulness, Adaptability, Flexibility
